PRAVEEN SHIVANAND TIRKANNAVAR

Bangalore, Karnataka | 6360854577 | ptirkannavar@gmail.com | github.com/praveentirkannavar |linkedin.com/in/praveen-shivanand-tirkannavar-4721a532a | https://praveentirkannavar.github.io/Praveen-Portfolio/

PROFESSIONAL SUMMARY

BCA graduate and Data Scientist Intern skilled in Python, SQL, Power BI and machine learning, with experience in data cleaning, analysis and dashboard development. Completed three end-to-end projects in predictive modeling and sales forecasting.

TECHNICAL SKILLS

Data Analysis & Science: Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Modelling, Machine Learning, KPI Tracking, Forecasting, Data Cleaning, Data Validation
Programming & Querying: Python (Pandas, NumPy, Scikit-learn, XGBoost, Matplotlib, Seaborn), SQL, MySQL
BI & Visualization: Power BI (DAX, Power Query), Tableau, Dashboard Development, Report Automation
Microsoft Office: Excel (Pivot Tables, VLOOKUP, XLOOKUP, Advanced Formulas, Conditional Formatting, Data Validation), PowerPoint, Word
Business & Process Skills: Requirements Gathering, Gap Analysis, Process Improvement, Business Reporting, Stakeholder Communication
Tools & Platforms: Jupyter Notebook, VS Code, Git, GitHub, MS Office Suite — comfortable picking up new tools quickly

PROFESSIONAL EXPERIENCE

PROJECT-BASED DATA SCIENCE INTERNSHIP — RUBIXE **Nov 2025 – Mar 2026**
Rubixe *Bangalore, Karnataka*

- Completed four assigned data science projects involving data cleaning, exploratory data analysis, visualization, classification, and predictive modeling.
- Analyzed and prepared datasets using Python, Pandas, NumPy, and SQL, identifying patterns and generating insights from structured data.
- Built visualizations and analytical outputs using Matplotlib, Seaborn, and Power BI to communicate findings clearly..
- Worked alongside cross-functional teams regularly, understood their data requirements, spotted gaps in existing reporting workflows, and delivered structured outputs and clear summaries that matched what the business actually needed.

PROJECTS

Customer Transaction Prediction **2026**
Python, XGBoost, Scikit-learn, Pandas, Matplotlib, Seaborn | GitHub

- Analyzed a 200,000-row customer transaction dataset with 200 features, performing data validation, preprocessing, and exploratory analysis; identified and addressed a 9:1 class imbalance in the target variable.
- Used stratified train-test splitting and StandardScaler to maintain class distribution and prepare features for machine-learning models.
- Compared Logistic Regression and XGBoost, using class-imbalance handling techniques; XGBoost achieved approximately 0.85 ROC-AUC and 89% accuracy.

E-Commerce Sales Analysis & Forecast Dashboard **2026**
SQL, Python, Excel, Power BI | GitHub

- Designed a 2-page interactive Power BI dashboard with KPI cards for Sales, Profit, Quantity and Average Delivery Time, plus 15 visuals covering Category, Sub-Category, Segment, Ship Mode and Payment Mode.
- Analyzed year-over-year sales and profit trends and state-wise performance using stacked area charts, a geospatial map and a Region slicer.
- Built a sales forecast with a 95% confidence interval to support demand planning.

EDUCATION

Bachelor of Computer Applications (BCA) **2025**
Karnataka University, Dharwad

CERTIFICATIONS

- Certified Data Scientist – Datamites (2026)
- Data Science Foundation – IABAC (2026)
